Technical **IMPROVEMENT** Bulletin

NEW!

Reflux 819/S

the **Reflux 819/S** is the new technical solution designed by **Pietro Fiorentini** to address applications characterized by high sulfur concentration in the gas fluid.

Thanks to **its special design**, it enables to achieve **perfect lock up** even if in case of severe sulfur concentration; in fact, the second actuator plug activates only in case of lock up, being consequently **immune from sulfur** accumulation during the lamination process.

This **technical solution** leads to **significant benefits** :

- Higher safety
- Less corrective maintenance
- Less planned maintenance

Available sizes: **Dn 2'' - 4'' - 6''**
