

Optimize Energy. Maximize Savings. Empower Operations.

# BrightLync®

Energy  
Management  
Solutions

**ROMET®**  
Innovate. Lead. Transform.

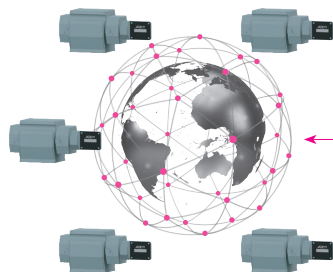

## Smarter Than a Meter—It's a Complete Monitoring Platform.

Built on Romet's legacy of precision and performance, the BrightLync® solution goes beyond gas measurement—delivering unmatched flexibility and visibility across your entire utility network.

### More Than Just Gas. One System. Many Signals.

BrightLync supports a wide array of endpoints and sensor types, enabling you to remotely monitor and manage:

- Natural Gas Usage
- Electric Consumption
- Water Flow
- System Pressure
- Temperature Trends
- Tank or System Level

BrightLync® is your centralized platform for multi-utility data, integrating remote telemetry units (RTUs), real-time cloud dashboards, and API access for full enterprise energy insight. Whether you're optimizing operations, tightening sustainability targets, or preparing for future scalability—BrightLync lets you “set it and forget it” with a powerful, user-focused platform that grows with your facility.
