

FOR IMMEDIATE RELEASE

Equipment Controls Company Expands SENSIT Representation into North and South Carolina

August 2026

SENSIT Technologies is pleased to announce that Equipment Controls Company (ECCO) is expanding its authorized representation to support customers throughout North Carolina and South Carolina.

This expansion strengthens SENSIT's presence across the Carolinas and provides customers with greater access to SENSIT's gas leak detection, gas analysis, and emissions monitoring solutions. Customers throughout the region will benefit from local product expertise, application guidance, demonstrations, and sales support through ECCO's experienced team.

Together, SENSIT and ECCO are committed to helping utilities, municipalities, contractors, engineers, and industrial operators improve safety, efficiency, and regulatory compliance with reliable technology and responsive regional representation.

About SENSIT Technologies

For over 45 years, SENSIT has been at the forefront of gas detection innovation, designing and manufacturing reliable leak detection, gas analysis, and monitoring solutions trusted by utilities, emergency responders, industrial facilities, and environmental professionals worldwide.
